

Job Title: Trainee, Equipment R&D

Kalmar keeps global trade moving. Our innovative solutions contribute to every fourth container movement in the world and help transform the future of cargo handling. We believe in collaboration, delivering on our promises and that people make the difference.

Do you want to make your next move count? With us, you can.

HT Equipment R&D Machine control team is looking for a trainee with an automation/computer science background. You will help the Machine control team with control system related R&D activities. The position is located in Tampere, Finland.

The trainee period lasts from May to August, but exact duration can be agreed with some degree of flexibility. Hybrid working after the induction period is possible.

Main tasks and responsibilities

- SW development for various crane applications
- Testing of applications in simulation and at the factory
- Create specifications for applications based on customer requirements.

What you'll need to succeed

- At least a 3rd year student in University of technology or University of applied sciences in the field of automation or computer science
- SW developing experience, e.g. PLC, C++, C, C#
- Fluent in English
- A can-do attitude.

You will be part of

We believe in our people as it is our people who really make the difference. We always work in close collaboration with our customers, deliver on our promises and never walk away no matter how big the challenge. We succeed because we do it together.

With us, you will have the opportunity to realise your potential and become an important member of our global team.

Our trainee network goes beyond a typical internship experience, creating a holistic environment that nurtures both professional and personal growth.

The traineeship is active during the summer, providing opportunities to connect with fellow trainees through various activities and events.

Interested to join?

If you are excited about this opportunity, please submit your application until 10.1.2024. We are reviewing the applications continuously and will fill the position when we find a suitable candidate.
